📍 Benin City, Edo State, Nigeria

Professional Summary

Dedicated Computer Engineering graduate with sound knowledge in machine learning, software engineering, and object-oriented programming. Well-versed in various business programming languages, such as Java, C, C-sharp, and Python, and more than 3 years of practical experience as a full-stack web developer. Proficiency in creating interactive, responsive online applications written in modern technologies like React, Tailwind CSS, Bootstrap, Node.js/Express, MongoDB/PostgreSQL/Firebase, Demonstrated potential to develop high quality projects as measured by professional experience and a strong personal project portfolio. An avid solver of complex problems, optimizer of user experiences, and user of cutting-edge innovation by using technologies. Looking to work on a meaningful product where I can add value, and still develop as a software engineer

Technical Skills

Front-End Development

- Languages:** JavaScript (Advanced), HTML5, CSS3, TypeScript (Advanced)
- Frameworks/Libraries:** React.js (Hooks), Next.js, Material-UI (MUI), Tailwind CSS, Bootstrap, Responsive Design Components
- Tools:** VS Code, Postman, Thunder Client

Backend Development

- Runtime:** Node.js (Expert Level—9/10)
- Frameworks:** Express.js (Expert Level)
- Databases:** MongoDB (Very Proficient), MySQL, Mongoose ODM

- APIs:** RESTful APIs, Blynk Cloud Services API

Development Tools & Technologies

- Version Control:** Git, GitHub, GitLab
- Cloud Services:** AWS, Google Cloud, Cloudinary
- Deployment:** Netlify, Vercel
- Testing:** Jest, Postman, Thunder Client
- CI/CD:** GitHub Actions, GitLab CI/CD, Netlify, Vercel Auto-Deploy
- Others:** IoT Integration, Real-time Applications, Multi-Agent Systems

Professional Experience

Full Stack Developer & Tutor | *Deebug Institute* | Oct 2024 – Nov 2025;

- Promoted from Backend Developer Intern to full-stack developer** after demonstrating exceptional technical skills and leadership abilities
- Lead Frontend Developer** for company's bootcamp program, managing a team of 4 developers
- Tutored 3 cohorts of students** in both frontend and backend development using the MERN stack
- Developed responsive web interfaces using **React.js and Material-UI** for company projects
- Built and integrated new features into existing company websites, including bootcamp registration system
- Key Projects:**
 - Deebug Ambassador Website:** Built complete frontend interface with Material-UI and React.js
 - Bootcamp Integration:** Added new bootcamp feature to main company website with full-page integration

Backend Developer | *White Water Research Group* | May 2024 - Oct 2024

- Started as a software development mentee and advanced to a backend developer role
- Worked on **One Health Project**—a remote monitoring system for healthcare applications
- Developed **report generation functionality** using Node.js and Express.js
- Collaborated in Agile sprints and contributed to project architecture decisions
- Gained experience in research-based software development and healthcare technology solutions

Featured Projects

Real-time Remote Monitoring System

Tech Stack: React.js, JavaScript, HTML5, CSS3, Blynk Cloud API, Netlify

- Built comprehensive IoT monitoring system for real-time humidity and temperature tracking
- Developed web interface to display live sensor data from ESP32 microcontrollers via Blynk Cloud

- Implemented intelligent alert system for threshold-based notifications
- Created responsive dashboard for remote monitoring capabilities

Multi-Agent Database Monitoring System

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, HTML5, CSS3, JavaScript, Vercel

- Developed sophisticated Multi-Agent system with three specialized applications (Worker, Auditor, Admin)
- Built comprehensive database activity monitoring for sales, logins, purchases, and user activities
- Implemented role-based access control and real-time activity tracking
- Created RESTful APIs for seamless data communication between agents

Deebug Ambassador Website | <https://ambassador.deebuginstitute.com/>

Tech Stack: React.js, Material-UI, HTML5, CSS3, JavaScript, Responsive Design, Netlify

- Built complete frontend interface for company's ambassador program
- Implemented responsive design, ensuring optimal user experience across all devices
- Utilized Material-UI components for consistent, modern user interface
- Collaborated with design team to translate requirements into functional web application

Deebug Bootcamp Integration | <https://deebuginstitute.com/bootcamp>

Tech Stack: React.js, Material-UI, CSS3

- Successfully integrated new bootcamp feature into existing company website
- Developed responsive web pages and seamlessly integrated with existing components
- Enhanced user experience by maintaining design consistency across platform
- Implemented registration and information systems for bootcamp participants

JS Performance Blog | <https://js-performance-blog.vercel.app/>

Tech Stack: Next.js (App Router), MongoDB, Mongoose, NextAuth.js, Cloundinary

- Developed a full-stack blog application using Next.js to explore performance impacts of modern JavaScript web development, including CRUD operations for posts, comments, likes, follows, and image uploads
- Implemented user authentication with NextAuth.js, enabling registered users to create/edit/delete posts, manage comments and likes, follow others, and access personalized dashboard stats (views, likes, posts, followers)
- Integrated Stats schema for real-time metric tracking and evaluated app performance against industry standards using tools like Lighthouse, WebPageTest, and Core Web Vitals (LCP, INP, CLS, TTFB)

Education

Bachelor of Engineering in Computer Engineering

University of Benin, Benin City | 2019 - 2025
Grade: Second Class Upper

Professional Training

- **Backend Development Training** | Deebug Institute | During Industrial Training
- **Full Stack Development Mentorship** | White Water Research Group | 2024

Additional Information

Languages

- English (Native/Fluent)

Leadership & Teaching

- Led frontend development team of 4 developers for bootcamp program
- Mentored and tutored 3 cohorts of students in MERN stack development
- Progressed from intern to team lead within 6 months

Interests & Community

- **Technology:** Active contributor to open-source projects
- **Community:** Regular attendee of tech hangouts and meetups
- **Hobbies:** Coding, reading manga, watching anime, doodling

Focus Areas: Real-time applications, IoT integration, accessible web design
